The Rockefeller Institute has announced through the Academy of Science at Washington a discovery by two of its investigators whereby immunity from cancer it is hoped may be obtained. The investigation was conducted by Drs. James B. Murphy and John J. Morton, over a period of two years. They discovered that in the white lymph cells of the blood there are the necessary factors in making animals immune from cancer. A decided increase in the white lymph cells gives absolute immunity, the physicians declare they ascertained.

The English pound sterling fell Monday to the lowest American value within the memory of man. Normally quoted at \$4.85 in foreign exchange, it opened at \$4.67, a loss of two cents from Saturday's low record of \$4.69. Greater demoralization was shown by the foreign exchange market at opening than ever recorded here before.

The allies' intention to declare cotton contraband has been communicated unofficially but authoritatively to the state department. The department's advice is that the decision has been reached and the delay in making announcement due to the necessity of arranging uniform treatment of the subject by all of the allies.

Berlin declares the left wing of the Bavarian army, under Prince Leopold, has fought its way across the Bug river near Drohiczyn, which is east of Sokolow and fifty miles northeast of Brest-Litovsk. This forms a slight wedge in the Russian front, virtually straight since the Warsaw salient was abandoned.

Grace Elliott, locked up on a charge of being drunk in Baltimore, related to the police a story charging that her companion, a half-breed, was "Jack the Ripper". She charges that he killed the Kohn girl and Murray boy in New York.

The romantic courtship of a pretty school teacher and a young business man of Paris, Ky., which culminated in a secret marriage last January, became known Saturday when Wallace Turney Clark announced his marriage of Miss Marian W. Lynch.

Mexicans crossed the Rio Grande in force near Mercedes, Tex., Monday and attacked a cavalry outpost. One U. S. soldier was killed and another wounded. An attack on Mercedes is planned by the Mexicans, about 270 in number.

President Yuan Shi Kai is discussing with his immediate supporters and Prof. Frank Johnson Goodnow of Johns Hopkins university, legal adviser to the Chinese government, the question of proclaiming himself emperor.

Charged with the murder of 15-year-old Hazel Macklin, Silas N. Ebersole hanged himself in the jail at South Bend, Ind.

Chancellor Allison has ordered a cut of 25 per cent. in the salaries of all Nashville city employees.

For Mending Graniteware.
Graniteware is difficult to mend, but several methods have been found. Shellac varnish poured over thin places in graniteware, and the vessel held over the fire to thoroughly harden the shellac, will greatly lengthen the uses of the leaky dish. Another way to mend small holes in tinware, graniteware, etc., is to place the vessel to be mended upon a hot stove; put a small piece of sealing wax over the hole and let it melt—not only melt, but burn into the ware. Cool gradually.

Sack Your Hams.

New supply of sack just received at this office.

ROULTRY

FEED FOR THE YOUNG DUCKS

Ducklings Do Not Require Nourishment Until They Are at Least Twenty-Four Hours Old.

Don't feed anything until the ducklings are at least 24 hours old, but they should have a little tepid water to drink, especially if the weather is very warm or if they have been hatched in an incubator.

Don't have the water within reach for very long at a time, as they will soon begin to "paddle."

Begin by placing a little dry bread, crumbled fine in the water which should always be given in shallow pans while the ducklings are small. Skim milk is used once or twice a day to soak the bread in instead of water, but be sure that there is no cream about the milk.

Coarse, sharp sand should be put in the water or placed near the vessel but never mixed with the feed. Some people do this after the ducks get old.

Runner Duck.

enough to eat grain mixtures but it is not a good plan, for when grit of any kind is put in the feed the ducks are often forced to eat more grit than they require.

Roller oats in water is good to feed once in a while for a change; it may also be fed dry. Corn cake is good occasionally but not often.

Some sort of green stuff is necessary, even while the ducklings are very small. In fact they will eat "greens" almost from the start. Lettuce, onion tops or dandelion leaves chopped fine are always relished, no matter if the grass is plentiful.

Young ducks should be fed from four to six times a day, according to the variety. Pekin ducks are the larger feeders and grow very fast; they require more feed than other ducks although they must not have feed that is highly concentrated. That is, it should be sufficiently nourishing but not too fattening.

KEEP EGGS IN WATER-GLASS

Receptacle Should Be Placed in Cool Cellar and Covered Over to Prevent Evaporation.

(By C. E. BROWN, Crookston Experiment Station.)

There are several good methods of preserving eggs, but the water-glass method is the best. Water-glass can usually be purchased at a local drug store for less than \$1 a gallon, making the cost about one cent for each dozen eggs.

The receptacle used should be an earthenware jar of from five to ten gallons. The eggs should be placed in the jar each day, when gathered, as the fresher the egg the better it will keep. Care should be exercised to see that none of the eggs is cracked, or the whole jar of eggs may be spoiled in a short time.

The jar should be placed in a cool cellar; a piece of oiled paper or some other water-proof cover should be placed over to prevent evaporation. If this is not done, any eggs that appear above the liquid will spoil rapidly. The eggs should be kept at least two inches below the surface of the liquid.

The solution recommended is one part of water-glass to ten parts of pure water.

INFERTILE EGGS GAIN FAVOR

Markets Are Gradually Coming to Discriminating Price on This Kind of Eggs for Trade.

Just as soon as the hatching season is over sell or kill the roosters so that your eggs will be infertile. Infertile eggs keep much better than fertile eggs. Gradually the markets are coming to a discriminating price on infertile eggs, especially for the best trade. As soon as the consumers get wise the demand will be greater.

Several states have instituted annual swat-the-rooster campaigns, and thus the people are made acquainted with the value of the infertile eggs.

Summer Care of Ducklings.

Water fowls need special attention during warm weather. Young ducklings feel severely the excessive heat. Exposure to the sun frequently gives them what is termed "blind staggers." The heat coming down on their heads affects their brains, they whirl about as if crazed and die of the effects of overheating.

Just Half In Bed.

Clyde, Ky.—Mrs. I. A. Decker: "I recommend Cardui, the woman's tonic, to any woman in need of a remedy. For five years, I was unable to do my own work. Half my time was spent in bed. At last I tried Cardui. Now I am well and happy, and can do my own work." Don't suffer pain, headache, backache, and other womanly miseries, when your own druggist has on his shelf a remedy for such troubles—Cardui. Get a bottle for your shelf. As a general tonic, for weak women, nothing has been found for 50 years that would take its place. Try it, it will help you.

HIGHWAY IMPROVEMENT

1,000-MILE ROAD PROPOSED

Canada to Build Route Similar to Lincoln Highway—To Extend From Winnipeg to Calgary.

Central-western Canada will have a federal highway much after the plan of the Lincoln highway proposed across the United States if the project being urged by the board of control of Winnipeg is carried out. This project contemplates the construction of a concrete highway from Winnipeg to Calgary, to go through the more thickly settled territory tapped by the Canadian Pacific railway.

The thousand miles of highway through the provinces of Manitoba, Saskatchewan and halfway into Alberta will be financed by the municipalities by which the roadway would be traversed. Special appropriations also will be sought from the provincial governments. The project has been received with enthusiasm in a number of the larger cities along the proposed route.

It has been pointed out by the promoters of the highway through the prairie provinces that its construction would enhance the value of the farm lands for several miles on both sides of the concrete roadway.

LOOKING AFTER GOOD ROADS

Splitlog Drag Can Be Employed to Good Advantage—Prompt, Intelligent Action Needed.

Every farmer should spend some time looking after the roads. The splitlog drag can be used to good advantage. Road dragging at the proper time will insure good dirt roads the greater part of the year. All it needs is prompt, intelligent action. It must, however, be done at the right time to get the best results.

Yes! It is true in many places that the road dragging should be done by the county, but every farmer should take enough interest in the community welfare to see that the road in front of his farm is gone over with a splitlog drag.

There is no other one thing that would add to our advancement, both commercial and social as much as would good roads. Spend a few hours at this season of the year, when the frost is coming out of the ground and the wet from rain and snow is drying up, with a splitlog drag and it will result in better roads, a good advertisement for your farm and its owner.

NEW YORK'S IMPROVED ROADS

State Spending One Hundred Million Dollars on High-Class Thoroughfares—Money Well Spent.

The state of New York is spending one hundred millions of dollars in building good roads. That seems like an enormous sum of money, but there was a demand for good roads, and the results so far secured are worth all the effort.

Over fifty million dollars have already been spent and about as much more is now available, and in a few years almost every portion of the state will be reached by high-class finished roads. They are like boulevards, well-constructed, well cared for and ought to be very permanent.

SCRAPER BOARD ON ROLLERS

Device Is Controlled by Levers and Can Be Made to Dig into Ground or to Deposit Earth.

A roller scraper recently brought out in California has a wooden scraper board mounted on rollers in such a

New Type of Roller Scraper.

way that it can be raised or lowered by controlling levers, placed in convenient reach of the operator's seat. This scraper is drawn by horses, and as the operator rides he can dig into the ground, or deposit earth as required, simply by manipulating the levers. The trailing rollers not only smooth down the earth, but make the pulling easier for the horses.—Popular Mechanics.

Waste Product for Roads.

It is reported that an experiment is being made with a material that heretofore has been a waste product of glass factories for roadmaking. This is a thick, sirupy liquid that hardens when exposed to the atmosphere, forming a substance that somewhat resembles glass.

Patience Required.

It takes a real Christian to drive two miles through the mud holes, and arrive at the church in an exalted frame of mind.

Mid-Summer Campaign Offer

Hopkinsville Kentuckian
ONE YEAR

AND

Daily Evening Post

UNTIL NOV. 10, 1915

FOR

\$2.50

This offer is made for mail subscribers only; those living in the country or on rural routes, or in small towns where the Evening Post cannot be delivered by carrier or agent.

225 Acre Farm For Sale

Meacham Farm Near Gracey
To Be Sold For Division.

The A. W. Meacham farm, one mile northeast of Gracey, is offered for sale for division. It consists of three tracts of land, lying on both sides of the old Bellevue road. Two tracts of 112 and 45 acres lie along side each other on the South side of said road and the other of 68 acres is just across the road, on the North side. A cottage of seven rooms is on the large tract, with large barn, stable and other out-buildings.

A never failing stream of water, known as Meacham's branch, crosses the farm. A portion of the large tract is in timber. The farm is rented for 1915, but partial possession for seeding crops could be given in the fall. For further information apply to

CHAS. M. MEACHAM, Hopkinsville,
J. P. MEACHAM, Gracey, or
T. J. BAYNHAM, Edgote.

WE CARRY a large stock of Brick, but owing to business depression generally we are overstocked. We also carry a full line of Cement, Lime, Fire-Brick, Sewer Pipe and Drain Tile. We have all grades and colors of Face Brick. Now is the time to build. Get our price before buying.
